About Us

KFPL started its journey in the year 2004 in Woven Sacks Industry. KFPL is a subsidiary of 'Kesarimal Pramod Kumar' estd in the year 1960 in Hyderabad, India. Our founder Late Shri Kesarimal ji Agarwal & his son Mr. Pramod Agarwal started trading of Jute bags and supplying all over the country and becoming a leader in it. Today, the company is under leadership of 3rd & 4th generation taking family business forward to new achievements.

KFPL is a flagship company of 'Shailesh Agarwal Group', The group is into various businesses like making of Steel, Jute, Woven Sacks, Real Estate & Equity Investments.

The group is lead by the Director - Shailesh Agarwal, having 27 years of experience in doing business and his vision for recognising opportunities to expand the industry is what makes the group elevate from competition.

Quality Control & Assurance

“We take quality as serious concern before delivering it to our clients. We make sure all our raw materials are ISO standards and our finished product ranks higher than what we promised.”

Following tests are executed in our lab before dispatching to our clients,

- Bag dimensions & Weight,
- Strength of the fabric,
- Calcium %,
- BOPP inks & Chemicals,
- Drop Test,
- Lamination Bonding

HDPE/PP Sacks & Fabric

- *High Density Polyethylene / Polypropylene fabric is made by weaving HDPE/PP tapes and later converted into bags/sacks.*
- *These HDPE/PP Sacks are popular substitute for the conventional Jute bags and much more cost efficient.*
- *Woven Sacks are light in weight but that doesn't impact its strength and it can also withstand heavy loads.*
- *These sacks can be provided with or without lamination coating as required by customer needs.*
- *Our Woven Sacks can be made in circular looms or flat looms.*
- *HDPE/PP sacks can be made in any colour required or multi colour strips on border. It is completely customisable.*

BOPP Printed Laminated Bags

- *Biaxially Oriented Polypropylene is thermoplastic film which is used for many applications in packaging sector.*
- *After BOPP Film is printed, it then gets laminated on woven sacks by adhesive coating.*
- *This BOPP film is printed in-house as per client's required design.*
- *We believe in using high quality inks for printing because it gives the deserved look and does justice for the design and brand it reflects.*
- *These designs are engraved onto a cylinder precisely by our best vendor suppliers we choose.*
- *Our in house design team is always available to create new elegant designs for upcoming brands or can modify the existing designs.*

Leno Bags

- *Leno bags are also made by weaving HDPE/PP tapes and later converted into bags/sacks.*
- *These Leno bags are Air permeable sacks which means its open mesh allows the inside product with supply of circulated air, preventing in decay of goods by hot air trapped in.*
- *Leno Bags are used to store fruits & vegetable, items which are perishable in nature over a certain time. Used for Onions, Garlic, Potatoes, Cabbage, Ginger, etc.*
- *Leno Bags can be made in any colour required, most commonly used colours are Red, Orange, Yellow, Green.*
- *They are mostly available in fillings of 10kgs, 25kgs & 50kgs.*
